

Dear Sir/Madam,

My name is Chris Marshall, I am an Associate Director in Global Supply Chain for Merck and Co. I am writing you today to recommend my colleague, Dan Schneider for your open position.

Dan has served as an intern to the Global Supply Chain group for the summer of 2017 and reported directly to me. His main project was testing a new supply chain information system solution for items where potency affects the bill of materials quantities. The custom solution accommodates logarithmic and piecewise linear potency models, allowing complex biological systems to be accurately modeled in the planning system. The UAT was completed without defects.

During his internship, Dan integrated well into the team. He had the opportunity to help deal with challenging supply chain disruptions, international tenders, and visit and interact with operations at multiple production facilities. He is bright, has a good work ethic and a collaborative nature. I believe he will fit well into any supply chain team.

Sincerely,

Chris Marshall

Associate Director  
Global Supply Chain  
Merck and Co.

Dear Sir/Madam,
